Code	Description	Upper Payment Amount**	Service Criteria
H0031	MH Assessment, non-physician	$92.20	Determination of a person's need for mental health services, based on the collection and evaluation of data obtained through interview and observation, of a person's mental history and presenting problem(s). The assessment concludes with documentation of a diagnosis and a written treatment plan supported by the assessment and interview data. If a person is not in need of mental health services, other disposition information, such as to whom the client was referred, shall be included in the client file.
H0032	Mental health service plan development by non-physician	$92.20	Activities to develop, evaluate, or modify a client's mental health services plan. This would include the statement of treatment or service goals, of clinical interventions designed to achieve those goals, and an evaluation of progress toward those goals. This activity may be repeated periodically and the plan may be modified.
T1023$_T$	Screening to determine the appropriateness of consideration of an individual for participation in a specified program, project or treatment protocol, per encounter	$92.20	Screening or evaluation of the mental health service needs of clients for consideration of admission to inpatient hospital psychiatric programs, partial psychiatric hospital programs, residential treatment, or outpatient treatment services. This service differs from a mental health assessment in that the activity may require not only the evaluation of a client's treatment needs, but also an evaluation of available treatment options.
90801	Psychiatric diagnostic interview	$136.17	The clinician interviews the patient in an initial diagnostic examination, which includes taking the patient's history and assessing his/her mental status, as well disposition. The psychiatrist may spend time communicating with family, friends, coworkers, or other sources as part of this examination and may even perform the diagnostic interview on the patient through other informative sources. Laboratory or other medical studies and their interpretation are also included.
90802	Interactive Psychiatric diagnostic interview	$136.17	The clinician performs a psychiatric diagnostic examination on the patient using interactive methods of interviewing. This is most often the method used with individuals who are too young or incapable of developing expressive communication skills, or individuals who have lost the ability. This type if diagnostic interview is often done with children. Toys, physical aids, and non-verbal interaction and interpretation skills are employed to gain communication with a patient not capable of engaging with the clinician by using adult language skills
96101	Psychological Testing with	$92.20	QMHP who is licensed Psychologist or a Psychology Intern supervised by a licensed Psychologist

Code	Description	Upper Payment Amount**	Service Criteria
90853	Group therapy	$46.12	The psychiatric treatment provider conducts psychotherapy for a group of several patients in one session. Group dynamics are explored. Emotional and rational cognitive interactions between individual persons in the group are facilitated and observed. Personal dynamics of any individual patient maybe discussed within the group setting. Processes that help patients move toward emotional healing and modification of thought and behavior are use, such as facilitating improved interpersonal exchanges, group support and reminiscing. The group may be composed of patients with separate and distinct maladaptive disorders or persons sharing some facet of a disorder. This code should be used for group psychotherapy involving patients other than the patient's families.
90857	Interactive group therapy	$46.12	The therapist provides interactive group psychotherapy, usually to patients who are too young, or incapable, of engaging with the clinician through expressive language communication skills, or individuals who have lost that ability. This type of psychotherapy is often done with children. Toys, physical aids, and non-verbal play and interaction, including the use of interpreter skills, are employed to help the patient and clinician work through the issues being treated. Reviewing patient records, including medication and lab tests, making observations and assessments and interpreting reactions and interactions within the group, arranging group and individual follow-up services, and record dictation are included.
90846$_T$	Family Therapy without patient present	$138.31	The therapist provides family psychotherapy in a setting where the care provider meets with the patient's family without the patient present. The family is part of the patient evaluation and treatment process. Family dynamics as they relate to the patient's mental status and behavior are a main focus of the sessions. Attention is also given to the impact the patient's condition has on the family, with therapy aimed at improving the interaction between the patient and family members.
90847	Family Therapy with patient present	$138.31	The therapist provides family psychotherapy in a setting where the care provider meets with the patient's family jointly with the patient. The family is part of the patient evaluation and treatment process. Family dynamics as they relate to the patient's mental status and behavior are a main focus of the sessions. Attention is also given to the impact the patient's condition has on the family, with therapy aimed at improving the interaction between the patient and family members.

			reestablishing residency in the community. Activities may be delivered on an individual or group basis and are designed to promote skill development and meet specific goals and measurable objectives in the treatment plan.
H2014	Skills training and development, per 15 min	$2.84	A program of rehabilitation designed to reduce or resolve identified barriers and improve social functioning in areas important to establishing and maintaining clients in the community; e.g., home, peer group, work or school. Activities are delivered to more than one client and are designed to promote skill development in areas such as decision-making, anger management and coping, community awareness and mobility, self-esteem and money management. Skills training reduces symptomatology and promotes community integration and job readiness.
H2023 T	Supported employment, per 15 min	$16.31	Services to promote rehabilitation and return to productive employment. Programs use a team approach to engage and retain clients in treatment and provide the supports necessary to ensure success at the workplace. Use of this code requires authorization from AMH.
H0036	Community psychiatric supportive treatment, face to face, per 15 min	$8.15	Structured developmental or rehabilitative programs designed to improve or remediate a person's basic functioning in daily living and community living. Programs shall include a mixture of individual, group, and activity therapy components and shall include therapeutic treatment oriented toward development of a person's emotional and physical capability in areas of daily living, community integration, and interpersonal functioning.
H2033	Multi-systemic therapy for juveniles, per 15 min	$23.05	Intensive, time-limited, home-based services delivered by appropriately licensed MST programs, consisting of individualized, comprehensive, integrated system interventions and empirically validated treatment approaches targeting multiple systems involved with a client, including peer, family, school, neighborhood, indigenous support network, and formal agency systems. MST is designed to promote behavior change in youth that have evidenced serious juvenile justice system involvement.
H0039T	Assertive community treatment, face to face, per 15 min	$31.33	A multidisciplinary, team based approach, providing proactive, focused, sustained care and treatment targeted at a defined group of consumers. Services are aimed at maintaining the individual's contact with services, reducing the extent of hospital admissions and seeking improvement with social functioning and quality of life. Services are most appropriate for

Code	Description	Upper Payment Amount**	Service Criteria
H0031 HK	MH Assessment, non-physician	$88.29	Determination of a person's need for mental health services, based on the collection and evaluation of data obtained through interview and observation, of a person's mental history and presenting problem(s). The assessment concludes with documentation of a diagnosis and a written treatment plan supported by the assessment and interview data. If a person is not in need of mental health services, other disposition information, such as to whom the client was referred, shall be included in the client file.
H0004 HK T	Behavioral Health counseling/therapy, 15 min	$22.01	Individual counseling or therapy in the planned treatment of a client's problem(s) as identified by an assessment and listed in the treatment plan. The intended outcome is the management, reduction or resolution of the identified problems.
90804 HK	Individual therapy, insight oriented, 20-30 min	$65.16	The therapist provides individual psychotherapy in an office or outpatient facility using supportive interactions, suggestions, persuasion, reality discussions, re-education, behavior modification techniques, reassurance, and the occasional aid of medication. These interactions are done with the goal of gaining further insight and affecting behavior change or support through understanding. Individual psychotherapy is performed face to face with the patient for 20 – 30 minutes. Report 90804 if the patient received psychotherapy only and 90805 if medical evaluation and management services were also furnished.
90805 HK	Individual therapy, insight oriented, with medication management, 20-30 min	$65.16	The therapist provides individual psychotherapy in an office or outpatient facility using supportive interactions, suggestions, persuasion, reality discussions, re-education, behavior modification techniques, reassurance, and the occasional aid of medication. 			management services were also furnished.
90862 HK	Medication Management	$65.16	MD or Psychiatric Mental Health Nurse Practitioner.
H0034 T HK	Medication Training/Support, per 15 min	$22.01	Activities to instruct clients, families, and/or significant others in the correct procedures for maintaining a prescription medication regimen.
H2010 T HK	Comprehensive medication services, per 15 min	$23.26	Services delivered by a licensed registered nurse or QMHP related to the prescribing, dispensing, administration and management of medications.
90853 HK	Group therapy	$44.16	The psychiatric treatment provider conducts psychotherapy for a group of several patients in one session. Group dynamics are explored. Emotional and rational cognitive interactions between individual persons in the group are facilitated and observed. Personal dynamics of any individual patient maybe discussed within the group setting. Processes that help patients move toward emotional healing and modification of thought and behavior are use, such as facilitating improved interpersonal exchanges, group support and reminiscing. The group may be composed of patients with separate and distinct maladaptive disorders or persons sharing some facet of a disorder. This code should be used for group psychotherapy involving patients other than the patient's families.
90857 HK	Interactive group therapy	$44.16	The therapist provides interactive group psychotherapy, usually to patients who are too young, or incapable, of engaging with the clinician through expressive language communication skills, or individuals who have lost that ability. This type of psychotherapy is often done with children. Toys, physical aids, and non-verbal play and interaction, including the use of interpreter skills, are employed to help the patient and clinician work through the issues being treated. Reviewing patient records, including medication and lab tests, making observations and assessments and interpreting reactions and interactions within the group, arranging group and individual follow-up services, and record dictation are included.
90846 HK T	Family Therapy without patient present	$88.29	The therapist provides family psychotherapy in a setting where the care provider meets with the patient's family without the patient present. The family is part of the patient evaluation and treatment process. Family dynamics as they relate to the patient's mental status and behavior are a main focus of the sessions. Attention is also given to the impact the patient's condition has on the family, with therapy aimed at improving the interaction between the patient and family

			members.
90847 HK	Family Therapy with patient present	$132.42	The therapist provides family psychotherapy in a setting where the care provider meets with the patient's family jointly with the patient. The family is part of the patient evaluation and treatment process. Family dynamics as they relate to the patient's mental status and behavior are a main focus of the sessions. Attention is also given to the impact the patient's condition has on the family, with therapy aimed at improving the interaction between the patient and family members. Reviewing records, communicating with other providers, observing and interpreting patterns of behavior and communication between the patient and family members, and decision making regarding treatment, including medication management or any physical exam related to the medication, is included.
G0176 HK	Activity Therapy related to the care and treatment of a person's disabling mental health condition, 45 minutes or more	$16.82	Therapeutic activities designed to improve social functioning, promote community integration and reduce symptomatology in areas important to maintaining or reestablishing residency in community; e.g., home, work, school, peer group. Activities are delivered to more than one person and are designed to promote skill development in areas such as stress management, conflict resolution, coping skills, problem solving, money management, nutrition, and community mobility.
G0177 HK	Training and educational services related to the care and treatment of a person's disabling mental health condition, 45 minutes or more	$46.80	Psychosocial skills development and rehabilitation services used to improve social functioning in areas important to maintaining or reestablishing residency in the community. Interventions are delivered on an individual basis and are individualized to meet specific goals and measurable objectives in the treatment plan. Interventions focus on developing and strengthening competencies in areas such as anger management, stress management, conflict resolution, money management, community mobility, symptom management and reduction.
H0036 HK	Community psychiatric supportive treatment, face to face, per 15 min	$7.81	Structured developmental or rehabilitative programs designed to improve or remediate a person's basic functioning in daily living and community living. Programs shall include a mixture of individual, group, and activity therapy components and shall include therapeutic treatment oriented toward development of a person's emotional and physical capability in areas of daily living, community integration, and interpersonal functioning.
H2018 HK	Psychosocial Rehabilitation Services, per diem	$97.72	Structured rehabilitative services and 24/7 crisis services delivered to individuals residing in specified residential treatment facilities. Service needs are identified in the assessment,

			prescribed in the individual treatment plan and include an appropriate mix and intensity of assessment, medication management, individual, group and activity therapy components. Services are oriented toward reducing symptoms, promoting community integration and transitioning the individual to a more integrated setting.
H2013 HK	Psychiatric health facility service, per diem	$343.03	Services provided in an intensively staffed 24-hour non-hospital facility under a physician approved treatment plan to a client who is 18 years old, be currently approved for long term psychiatric care and referred by ECMU for which treatment includes an appropriate mix and intensity of assessment, medication management, individual and group therapies and skills development to reduce or eliminate the acute symptoms of the disorder and restore the client's ability to function in a home or the community to the best possible level. (PAITS program)
90882 T HK	Environmental intervention with agencies, employers, or institutions	$88.29	The clinician uses this code to report work done with agencies, employers, or institutions on a psychiatric patient's behalf in order to achieve environmental changes and interventions for managing the patient's medical condition.
90887 T HK	Interpretation or explanation of results to family or other persons	$88.29	The clinician interprets the results of a patient's psychiatric and medical examinations and procedures, as well as other pertinent recorded data, and spends time explaining the patient's condition to family members and other responsible parties involved with the patient's care and well-being. Advice is also given as to how family members can best assist the patient.
T1013 HK	Sign language/oral interpreter service, per 15 min	$7.99	Sign language/oral interpreter services necessary to ensure the provision of services for individuals with hearing impairments or in the primary language of non-English speaking individuals. Such interpreters shall be linguistically appropriate and be capable of communicating in English and the primary language of the individual and be able to translate clinical information effectively. Reimbursement for interpreter services is only allowed when provided in conjunction with another service such as assessment, individual/family therapy, or group therapy, etc. Whenever feasible, individuals should receive services from staff, who are able to provide sign and/or oral interpretive services. In this case, interpreter services cannot be billed in addition to the therapeutic service.

DHS Addictions and Mental Health Division

NON–OHP MEDICAID SERVICES

Use of the following codes requires authorization by AMH

Code	Description	Upper Payment Amount**	Service Criteria
H0017 TN	Behavioral health, residential (hospital residential treatment program), without room and board, per diem	$123.54	Services provided by appropriately licensed 24-hour child and adolescent psychiatric residential treatment facility. An organized program of theoretically based individual, group and family therapies, Psychosocial skills, development, medication management, psychiatric services and consultation provided within a structured residential setting to remediate significant impairments in functioning that are the result of a principal mental or emotional disorder.
H0018 TN	Behavioral health, short term residential (non-hospital residential treatment program) without room and board, per diem	$123.54	Services provided by appropriately licensed 24-hour child and adolescent psychiatric residential treatment facilities for assessment, evaluation and stabilization of a child in a secure setting under the direction of a board certified child psychiatrist for up to 90 days.
H0019 TN	Behavioral health, long term residential (non-medical, non-acute care in a residential treatment program where stay is typically longer than 30 days) without room and board, per diem	$123.54	Services provided by appropriately licensed 24-hour child and adolescent psychiatric residential treatment facilities. The program must provide a range of professional expertise and treatment services that ensures appropriate and active treatment of a current DSM Axis I diagnosis. Services must be expected to improve or maintain the child's functional level.
S5146	Foster Care, therapeutic, child, monthly rate at a minimum of 40 hours	$2,486.42	Rehabilitation services provided in the child's foster home. Delivered on an individualized basis and designed to promote skill development. This service requires the use of treatment foster care in coordination with other mental health interventions to reduce symptoms associated with the child's mental or emotional disorder and to provide a structured, therapeutic environment. The service is intended to reduce the need for future services, increase the child's potential to remain in the community, restore the child's best possible functional level, and to allow the child to be maintained in the least restrictive setting.

"T" indicates service may be provided telephonically

Providers must bill at rates, based upon the cost of services determined through a cost allocation plan, not in excess of their usual and customary charge to the general public
(OAR 309-016-0105 and OAR 309-016-0420)

Modifier Definitions:
HK – Specialized mental health programs for high-risk populations HN – Bachelors degree level TN – Rural/outside providers' customary service area

DHS Addictions and Mental Health Division

Code	Description	Upper Payment Amount**	Service Criteria
T2010	Preadmission screening and resident review (PASSR) Level I identification screening, per screen	$173.22	The screening of clients in nursing facilities (NF) to determine if a resident requires a PASRR Level II mental health evaluation. This review involves an analysis of data regarding symptoms of mental illness and results in a decision to deny or perform a PASRR Level II mental health Evaluation. Notification of this decision will be sent to the NF and AMH. Reviews may be repeated one time within 12 months to adjust treatment recommendations or arrange for mental health treatment.
T2011	Preadmission screening and resident review (PASSR) Level II evaluation, per evaluation	$606.27	The determination of a person's need for specialized services as defined by OBRA 1987 legislation. It involves the collection and evaluation of data pertinent to the person's Psychosocial functioning, medical and cognitive status, history of psychiatric treatment and medication needs. The assessment will result in a completed PASRR evaluation form on file at the Addictions and Mental Health Division (AMH) and in the client's chart. Limited to one evaluation per 12-month period.
H2016 HK	Comprehensive community support services, per diem	$191.00
