Boats manufactured in the United States (except military vessels) have a three-character U.S. Coast Guard manufacturer's identification code as the first three characters of the manufacturer's assigned boat hull number. Some large manufacturers who have several boat building plants have been assigned multiple codes by the U.S. Coast Guard. When entering a record for a boat made by such a manufacturer, the BMA Field code should agree with the first three characters of the boat hull number.

Canadian manufacturers may apply to the U.S. Coast Guard for a manufacturer's identification code. If the U.S. Coast Guard assigns a code, it will begin with the alphabetic Z.

Section 4.2 contains BMA and BRA Field Codes for boat and boat part manufacturers. For Boat File records, if a code is not listed, the code MISC should be entered as characters 1 through 4 of the BMA Field with the actual manufacturer's name appearing in positions 5 through 24. If the manufacturer's name is not known, positions 5 through 24 of the BMA Field should be used to describe the boat including any information which can lead to the determination of the manufacturer's name. If a brand name for a part is not listed, a Vehicle/Boat Part File record may be entered using the generic code PART in the BRA Field with information concerning the manufacturer placed in the Miscellaneous Field. For unlisted makes, the CJIS Division staff should be contacted at 304-625-3000 for code assignments.

SECTION 1--MAKE (MAK) FIELD CODES

1.1 MAK FIELD

Section 1.5 contains MAK Field codes listed alphabetically by gun manufacturer. If a make is not listed, the code ZZZ should be entered as characters 1 through 3 of the MAK Field with the actual manufacturer's name appearing in positions 4 through 23. This manufacturer's name will appear as entered in any record response. If the MAK Field code is ZZZ and positions 4 through 23 are blank, the MAK Field will be translated as MAK/UNKNOWN in the record response. For unlisted makes, the CJIS Division staff should be contacted at 304-625-3000 for code assignments. Additional coding instructions can be found in the Gun File chapter of the NCIC 2000 Operating Manual.

1.2 MAK FIELD CODE FOR U.S. MILITARY-ISSUE WEAPONS

For firearms (including surplus weapons) that are U.S. military-issue weapons, the MAK Field code USA should be used. Common U.S. military-issue weapons include the following:

U.S. Military-Issue Weapons

7.62 mm U.S. Rifle, M14

5.56 mm U.S. Rifle, M16 and M16A1, etc.

.30 caliber U.S. Rifles: Models 1892, 94, 96, 98 (Krag); Models 1903 and 1903A3, etc. (Springfield); M1 (Garand); and M1917 (Enfield)

.30 caliber U.S. Machine Guns (including the BAR, etc.)

.410-gauge and/or .22 U.S. Survival Guns, M4 and M6

1.3 MAK FIELD CODES FOR NONMILITARY U.S. GOVERNMENT WEAPONS

For a nonmilitary weapon bearing a U.S. Government property inscription and the manufacturer's name on the frame or receiver, the appropriate manufacturer's MAK Field code from Section 1.5 should be used. For example, MAK/SW should be used for Smith & Wesson, and MAK/CLT should be used for Colt revolvers bearing the inscription U.S. Border patrol, Naval Investigative Service, U.S. Air Force, Treasury Department, etc.

1.4 MAK FIELD FOR FOREIGN MILITARY WEAPONS

Foreign military firearms should be coded according to the make on the firearm. If the make is undeterminable, codes should be selected according to the country where the gun was manufactured. If neither the make nor the country where manufactured is known, additional information concerning coding can be found in the Gun File chapter in the NCIC 2000 Operating Manual.

SECTION 2--CALIBER (CAL) FIELD CODES

2.1 CAL FIELD CODES

Firearms are identified by make, model, serial number, type (rifle, shotgun, etc.), and cartridge-type designation. Cartridge types are most often expressed in calibers (decimals of an inch) or in millimeters, for example the .357 Magnum and 9 mm Luger. It is also possible for the same cartridge to have both an English and a metric designation. For example, the .308 Winchester is also known as the 7.62x51 NATO. A weapon with this cartridge-type designation could be entered using either the CAL 308 or 762. Entries should be made based on the markings on the weapon.

Many ammunition and weapon manufacturers name cartridge types after the company. One example is the 7 mm Remington Magnum that was developed by the Remington Arms Company. The manufacturer associated with a cartridge type should not be confused with the make of the firearm. For example, the .38 Smith & Wesson (S & W) Special cartridge was developed by Smith & Wesson, but many companies manufacture weapons chambered for this cartridge type.

The Caliber (CAL) Field is intended to contain the broad cartridge-type designation of a firearm. Because of the volume of cartridge types and the differing methods of measurement used (English, metric, or gauge) in identifying them, the table below has been prepared to assist in data entry. The "CAL" column contains the CAL codes, and the "Common Names/Examples" column contains common cartridge-type designation examples. In cases of ambiguity in cartridge-type designations, further identifying information, if available, should be placed in the Miscellaneous (MIS) Field.

Users will note that some cartridge types have more than one designation. Additionally, due to exisiting programming, the NCIC 2000 System does not distinguish between some cartridge types with similar designations. The .308 Winchester/7.62x51 NATO, as noted above, could be entered as either 308 or 762. If entered as 762, no distinction between a 7.62x51 NATO, a 7.62x39 Soviet, or a 7.62 mm Tokarev would be made. Users should be aware of this when making Gun File inquiries, especially if an inquiry leads to multiple hits on firearms with similar cartridge-type designations.

2.2 CAL FIELD CODES FOR SHOTGUNS

The gauge system of bore measurement is unique and totally different from the English caliber or metric methods of measurement. Shotgun gauges are normally expressed as whole numbers, followed by the word "gauge" or an abbreviation for it, for example 12-gauge or 12-ga. Under the English system of shotgun gauges, the lower the numerical value, the larger the bore diameter. With most common shotgun cartridge types, the bore diameter when expressed in decimals of an inch or millimeters is not the same as the gauge. A 12-gauge's bore diameter is not .12 caliber; nor is it 12 millimeters. The exception is the 410-gauge; it is a true .41-caliber bore diameter. There are also metric designations in use (listed below), but these will usually be designated in millimeters or with the abbreviation "mm." The appropriate gauge should be entered in the CAL Field. Some shotgun gauges are numerically the same as some calibers, especially metric designations. The weapon type should be designated in the Type (TYP) Field to eliminate any confusion.

3.2 MOST FREQUENTLY USED TYP FIELD CODES

Gun Type	Code	Comments
Rifle, Flintlock	RH	A muzzle-loading rifle fired by the action of a piece of flint held in the hammer jaws.
Grenade launcher	GN	Examples: U.S. M79, U.S. M203 grenade launchers.
Machine gun	MA	Any full-size military automatic machine gun. Examples: U.S. M60, U.S. Browning Model 1919A4. Most machine guns use rifle-caliber ammunition. Some large-caliber machine guns, such as the U.S. .50-caliber Browning M2HB machine gun, use special ammunition.
Mortar launcher	ON	Example: U.S. 60 mm mortar launcher.
Pistol, Automatic	--	Keeps firing as long as the trigger is held back. Originally designed as a handgun, it has a selector switch that allows it to be fully automatic and may be fitted with a shoulder stock. Should not be confused with semiautomatic pistol. A fully automatic pistol should be coded with TYP code B.
Pistol, Bolt-action	PB	Example: Remington Model XP 100.
Pistol, Derringer	PD	Small handgun that may be single-shot (one barrel) or two shot (double-barreled).
Pistol, Flintlock	PH	A muzzle-loading handgun fired by the action of a piece of flint held in the hammer jaws.
Pistol, Jet-propelled	PJ	Example: 13 mm Gyrojet handgun manufactured by MB Associates.
Pistol, Percussion	PU	Black-powder handgun fired by the hammer striking a percussion cap as opposed to a flintlock or modern metallic cartridge ammunition.
Pistol, Revolver	PR	Uses a cylinder to retain the cartridges in the weapon.
Pistol, Semiautomatic	PI	Also known as autoloading or self-loading. Often incorrectly referred to as "automatic." Fires only one shot with each pull of the trigger. Examples: .45-caliber U.S. 1911A1 pistol, German Luger.
Pistol, Single-shot	PS	A pistol having no magazine and loaded with only one cartridge at a time.
Rifle, Automatic	RA	Any rifle having the capability of fully-automatic fire but which is not a machine gun or submachine gun. Examples: U.S. M16, Soviet SKS, AK-47 assault rifles, U.S. M14 rifle.
Cannon	A	Example: U.S. 105 mm howitzer.
Rifle-Shotgun Combination	C	Refers to a shoulder-fired weapon that combines both rifle and shotgun barrels in one firearm. One of the better known is the Drilling, a side-by-side shotgun with an attached rifle barrel located below and between the two shotgun barrels. Many imported combination guns designed for the U.S. market are known as turkey guns.
Shotgun, Single-shot	SS	A single barrel shotgun having no magazine and loaded with only one cartridge at a time.

Shotgun, Semiautomatic	SI	Also known as autoloading or self-loading and incorrectly as an "automatic." Fires only one shot with each pull of the trigger. Examples: Browning automatic shotgun, Remington Model 1100.
Shotgun, Pump-action	SP	Also known as "slide" and "trombone." Action operated by a sliding pull-push fore-end, usually located beneath the barrel. Examples: Winchester Model 12, Remington 870, Ithaca Model 37.
Shotgun, Over and Under	SO	A shotgun having barrels aligned one on top of the other. Though technically a double-barrel, the latter term is reserved for those having a side-by-side configuration. If an over and under weapon has one rifle barrel and one shotgun barrel, it should be coded C (rifle-shotgun combination).
Shotgun, Double-Barrel	SE	A shotgun having two barrels arranged side-by-side.
Rifle, Bolt-action	RB	Uses a turn-bolt mechanism to load, fire, and extract/eject cartridges.
Rocket Launcher	KN	Examples: bazooka, light antitank weapon
Rifle, Carbine	RC	A short, lightweight shoulder weapon not capable of fully automatic fire. Example: .30-caliber U.S. M1 Carbine.
Rifle, Single-shot	RS	A rifle other than bolt-action having no magazine and loaded with only one cartridge at a time. Examples: Ruger No. 1 Rifle, Winchester High Wall.
Rifle, Semiautomatic	RI	Also known as autoloading or self-loading. Often incorrectly referred to as an "automatic." Fires only one shot with each pull of the trigger. Examples: .30-caliber U.S. M1 Rifle, Ruger .44-caliber carbine.
Rifle, Pump-action	RP	Also known as "slide" or "trombone." Action is operated by a sliding pull-push fore-end usually located beneath the barrel.
Rifle, Percussion	RU	Black-powder rifles fired by the hammer striking a percussion cap as opposed to a flintlock or modern metallic cartridge ammunition.
Rifle, Lever-action	RL	Lever-action repeating rifles only. Does not include single-shot weapons that use a lever.
Submachine Gun or Machine Pistol	B	Submachine guns normally use pistol-caliber ammunition. Very often European-manufactured submachine guns are referred to as machine pistols in their country of origin, even though they were not designed or used as handguns. Examples: Uzi, HK MP5, Mauser machine pistol, Thompson submachine gun.
Shotgun, Bolt-action	SB	A shotgun using a turnbolt mechanism.

SECTION 1--INTRODUCTION

This part contains instructions and codes for personal descriptor fields contained in the NCIC 2000 person files and the Interstate Identification Index (III).

SECTION 2--NAME FIELDS

2.1 NAME (NAM), ALIAS (AKA), PROTECTED PERSON NAME (PPN), NAME OF SUPERVISING OFFICER (SON), PERSON WITH INFORMATION NAME (PIN), AND PERSON WITH INFORMATION ALIAS (PAK) FIELDS

The name that appears in the NAM Field of person file entries and inquiries (except for Gang File and Known or Appropriately Suspected Terrorist (KST) File QGM inquiries), the PPN Field of Protection Order File entries, the SON Field of Supervised Release File entries, the AKA Field of person file (excluding Gang File and KST File) supplemental entries, and the PIN and PAK Fields of Person with Information (PWI) supplemental entries must be coded in the following order: mandatory surname, mandatory comma, space (optional), mandatory first name or initial, space (include only if middle name or initial will follow), middle name(s) or initial(s) if any, mandatory space after each middle name or initial except last one, and suffix denoting seniority (Jr., II, etc.) if any. For example:

SMITH, JOHN HENRY
SMITH, JOHN HENRY JR
SMITH, JOHN H Q
SMITH, JOHN HENRY LEWIS

Complete names are to be used if available. No unit of a name or alias should be abbreviated UNLESS the complete name exceeds the 30-character maximum field length. Should a name exceed the maximum field length, the initial(s) of the middle name(s) should be used rather than the full middle name(s).

When entering records for persons with only one name, the only name as the surname and an alphabetic X as the first name should be used.

Abbreviations such as FNU, IO, LNU, MNU, NMI, and NMN should not be used.

Titles or degrees of individuals, including foreign titles and degrees, and their abbreviations (Mr., Miss, Mrs., Ms., Prof., Ph.D., Capt., Lt., D.D.S., Dr., Rev., etc.) are not used in the NAM Field; however, a title or degree may be included as an alias when it is known or believed the title or degree may be used as an identity by the individual. Its location is the same as (or following) data showing seniority. For example:

BROWN, JOHN WILLIAM REV
SMITH, ROBERT L MRS

Apostrophes (O'Neal, O'Boyle) should be eliminated.

Names appearing in Gang File and KST File QGM inquiries and as Gang File and KST File supplemental AKAs may be entered without using commas as monikers may be used.

Nicknames can be entered in the AKA Field for all person files. Enter the nickname as the surname followed by a comma (space after comma is optional), then an X (i.e., Peanut, X). The term nickname in NCIC is defined as a name added to or substituted for the proper name of a person, such as their street name (i.e., Shorty). It is not a familiar form of a proper name, such as Jim for James.

2.2 COMPOUND SURNAMES

For compound surnames, the full name including both surnames should be entered. For example:

Subject's Name - Jane Smith-Jones (hyphenated)
NCIC Name - SMITH-JONES, JANE

*Subject's Name - Jane Smith Jones (not hyphenated)
NCIC Name - SMITH JONES, JANE

*Subject's Name - Jose Rodriguez y Gonzalez (Spanish letter Y used as a separator)
**NCIC Name - RODRIGUEZ Y GONZALEZ, JOSE

*Each surname component of the full name MUST be entered individually as a separate alias in a supplemental record entry to ensure the possibility of a hit should either surname be inquired upon.

**When each surname component is entered individually as an alias, the letter Y should not be entered. Using the example, the following two aliases would be appended to the base record:

AKA/RODRIGUEZ, JOSE
AKA/GONZALEZ, JOSE

SECTION 3--SEX (SEX), SEX OF VICTIM (SOV), PROTECTED PERSON SEX (PSX), PERSON WITH INFORMATION SEX (PIX) FIELD CODES

Sex must be indicated by either F (female) or M (male) or [U (unknown) in NCIC] or [X (unknown) in III.]

SECTION 4--RACE (RAC), PROTECTED PERSON RACE (PPR), AND PERSON WITH INFORMATION RACE (PIR) FIELD CODES

SECTION 14--FINGERPRINT CLASSIFICATION (FPC) FIELD CODES

14.1 FPC FIELD CODES

The FPC is comprised of 20 characters. Two characters represent each finger as follows:

Positions	Finger
1 and 2	Right thumb
3 and 4	Right index
5 and 6	Right middle
7 and 8	Right ring
9 and 10	Right little
11 and 12	Left thumb
13 and 14	Left index
15 and 16	Left middle
17 and 18	Left ring
19 and 20	Left little

When the FPC Field is coded using data from III records the following apply:

* The FINGERPRINT CLASS is furnished on two lines. The first line represents the fingerprint classification of the right hand. The second line represents the left hand. The FPC Field should be coded using the information from the first line as positions 1 through 10 and the second line as positions 11 through 20.

* The PATTERN CLASS is furnished on one, two, or three lines. The entire first line information should be used in positions 1 through 20 of the FPC Field.

* When both classifications are available, the FINGERPRINT CLASS for FPC coding should be used.

The following codes apply to the FINGERPRINT CLASS:

Pattern Type	Pattern Subgroup	FPC Code
Arch ------	Plain Arch	AA
Arch -----	Tented Arch	TT
Loop -----	Radial Loop	Two numeric characters. Determine actual ridge count and add fifty (50). For example, if the ridge count of a radial loop is 16, add 50 to 16 for a sum of 66. Enter this sum (66) in the appropriate finger position of the FPC Field.
Loop -----	Ulnar Loop	Two numeric characters indicating actual ridge count (less than 50). For example, a ridge count of 14, enter as 14; a ridge count of 9, enter as 09.
Whorl -----	Plain Whorl	
Whorl -----	Inner	PI
Whorl -----	Meeting	PM

Whorl -----	Outer	PO
Whorl -----	Central Pocket Loop Whorl	
Whorl -----	Inner	CI
Whorl -----	Meeting	CM
Whorl -----	Outer	CO
Whorl -----	Double Loop Whorl	
Whorl -----	Inner	DI
Whorl -----	Meeting	DM
Whorl -----	Outer	DO
Whorl -----	Accidental Whorl	
Whorl -----	Inner	XI
Whorl -----	Meeting	XM
Whorl -----	Outer	XO
Complete Scar/Mutilated Pattern (6)		SR
Missing/Amputated Finger (7)		XX

The following codes apply to the PATTERN CLASS:

Pattern Type	FPC Code
Arch	AU
Loop - Left Slant	LS
Loop - Right Slant	RS
Whorl	WU
Complete Scar/Mutilated Pattern	SR
Missing/Amputated Finger	XX
Unable to Classify	UC
Unable to Print (e.g., bandaged)	UP

(6) Code SR is used in instances in which the fingerprint cannot be accurately classified because of complete scarring or mutilation and a classifiable print cannot be obtained. As in the case of missing and amputated fingers, the procedure for assigning the classification of the opposite finger, as is done under the Henry System, SHOULD NOT BE USED for the NCIC FPC.

(7) Code XX is used in instances of missing and totally/partly amputated fingers where conditions make it impossible to accurately classify an impression according to the above instructions for NCIC FPC. It is recognized that under the Henry System, if a finger is missing or amputated, it is given a classification identical to the opposite finger; however, THIS MUST NOT BE DONE in the NCIC FPC since the location of finger or fingers missing/amputated is not indicated.

14.2 FPC FIELD FOR UNIDENTIFIED PERSON FILE RECORDS

Classifying fingerprints for unidentified person record entries is the exception to the instructions in Section 14.1. The exceptions are as follows:

* The code NA is used when a finger cannot be printed because it has been amputated and not found with the body, and the amputation of the finger was related to the death of the individual. Antemortem amputations that are not related to the death of the individual are indicated by using the code XX (missing/amputated).

* The code NA is also used when a finger cannot be printed because it is burned or mutilated and the burning or mutilation was related to the death of the individual. Antemortem burns, mutilations, and scars that are not related to the death of the individual are indicated by using the code SR (scarred/mutilated).

* If all ten of the deceased individual's fingers have been amputated and not found with the body, burned, or mulitated, and the amputation, burning, or mutilation is related to the death of the individual, the code NFP may be entered in the FPC Field. The NCIC computer will convert the code NFP to ten NAs for insertion in the FPC Field.

SECTION 15--MISCELLANEOUS IDENTIFYING NUMBER (MNU) FIELD CODES

The appropriate two-letter identifying code must precede the number and is separated from the MNU by a hyphen (-). Any alphabetic character(s) which is part of the MNU IS TO BE INCLUDED, except as noted below.

Number	Code
Air Force Serial Number (8)	AF
Air National Guard Serial Number (8)	AS
Alien Registration Number	AR
Army Serial Number (8)	AS
Canadian Social Insurance Number	CI
Marine Corps Serial Number	MC
Mariner's Document or Identification Number	MD
National Agency Case Number-Military	NA
National Guard Serial Number (8)	AS
Navy Serial Number	NS
Nonimmigration Admission Number	AN
Originating Agency Police or State Identification Number (NCIC only)	OA
Passport Number	PP
Personal Identification Number (applies only to state or foreign government-issued numbers)	PI
Port Security Card Number	PS
Royal Canadian Mounted Police Identification or Fingerprint Section (FPS) Number	MP
Selective Service Number	SS
U.S. Coast Guard Serial Number	CG
Veterans Administration Claim Number	VA

U.S. military services are now using Social Security Numbers (SOCs) to identify military personnel. This use applies to active duty, reserve, and retired servicemen. THIS NUMBER SHOULD BE ENTERED IN BOTH THE MNU AND SOC FIELDS. For example, if a subject has SOC 420-19-0210 and Army Serial Number 420190210, the SOC would be entered in the SOC Field as 420190210, and the Army Serial Number would be entered in the MNU Field as AS-420190210.

---

(8) Omit any alphabetic character(s) prefixed to Air Force, Air National Guard, Army, and National Guard Serial Numbers. For example, Army Serial Number RA 189001645 would be shown as AS-189001645 and National Guard Serial Number NG-210001999 would be shown as AS-210001999.

SECTION 16--SOCIAL SECURITY NUMBER (SOC), PROTECTED PERSON SOC (PSN), AND PERSON WITH INFORMATION SOC (PSS) FIELD

A SOC in an entry or inquiry must be shown without dashes; for example, SOC 420-19-0210 would appear in the SOC Field as 420190210.

SECTION 17--OPERATOR'S LICENSE DATA

17.1 OPERATOR'S LICENSE DATA

Information from a license issued to operate a motor vehicle or a license issued by the Federal Aviation Administration (FAA) to operate an aircraft may be entered.

When information from a pilot's license is entered, a comment must be made in the MIS Field indicating that the license is not a motor vehicle operator's license. For example:

OLN IS PILOTS LIC
OLN/PILOTS LIC

Expired license information may be entered when current data are not available.

17.2 OPERATOR'S LICENSE NUMBER (OLN) FIELD

The complete license number is to be entered omitting spaces, hyphens, and symbols. Any alphabetic characters which are part of the license number must be entered.

17.3 OPERATOR'S LICENSE STATE (OLS) FIELD

The appropriate two-character alphabetic code for the jurisdiction (state, territory, province, etc.) or foreign country which issued the license should be entered. (OLS Field codes are the same as POB Field codes. Appropriate codes can be found in the State and Country Data Codes chapter of this manual.)

The code US should be used for license state of a pilot's license issued by the FAA. For a pilot's license issued by a foreign country, the appropriate code from the State and Country Data Codes chapter of this manual should be entered.

17.4 OPERATOR'S LICENSE YEAR OF EXPIRATION (OLY) FIELD

The four digits of the highest year in which the operator's license is valid (YYYY) should be entered.

NX indicates that an operator's license is nonexpiring; that is, indefinitely valid or valid until revoked.

If the year of expiration is unknown, but the OLN and state of issue are known, the current year may be entered as the year of expiration if the correct year of expiration cannot be obtained from the issuing state.

[2] Code F is intended to be used to designate records that are entered into the Missing Person File, Other Category, in order to comply with Suzanne's Law. On April 7, 2003, the United States Congress enacted Suzanne's Law, which Modified Title 42, United States Code (U.S.C.), Section 5779(a). In accordance with this statute, agencies are required to enter records into the NCIC Missing Person File for missing individuals **under the age of 21.**

SECTION 25--CORRECTIVE VISION PRESCRIPTION (VRX) FIELD CODES

The VRX Field may contain up to 40 characters and any character in the NCIC character set (except for the period) to indicate the appropriate corrective vision prescription for the individual.

A vision prescription usually contains two sets of values, one for the right lens and one for the left lens. The prescription for the right lens is usually prefixed with the characters OD or R. The prescription for the left lens is usually prefixed with the characters OS or L. Each prescription may contain up to five elements which describe the sphere, cylinder, axis, add (for bifocals), and prisms of the lens. Most prescriptions for juveniles will contain only the sphere, cylinder, and axis.

The VRX Field is to be coded exactly as the prescription was written by the ophthalmologist, optometrist, optician, or laboratory technician. However, the NCIC computer will not accept some of the symbols used in prescriptions. In these instances, the following codes to should be used for symbol entry.

Code	Prescription Symbol
D	. (decimal)
E	= (equals)
X	x (times)

The following are examples of vision prescriptions and proper coding for the VRX Field.

Rx OD-2.50=-.25x90 OS-2.00=-.25x95	VRX/OD-2D50E-D25X90 OS-2D00E-D25X95

Rx OD PL=+1.00x180 OS+3.00=+1.00x170	VRX/OD PLE+1D00X180 OS+3D00E+1D00X170

If the vision prescription contains more than 40 characters, the right lens information should be entered in the VRX Field and the left lens information should be entered in the MIS Field. For example:

Rx OD-12.00=-.25x140 .5 Degrees Base Up
OS-12.50=-.25x120 .5 Degrees Base Down

VRX/OD-12D00E-D25X140 D5 DEGREES BASE UP

ALL	All 32 teeth are present and are virgin teeth. May have caries but no restoration. NCIC will automatically assign a "V" to each tooth.
UNK	Dental characteristics are not available for all 32 teeth. NCIC will automatically assign a "/" to each tooth.

The following is a description of the codes to be used for the DCH Field in a supplemental dental entry. When entering dental characteristics, the agency should identify each tooth by the tooth number 01 thru 32, followed by the appropriate code. The coding for each tooth should be separated by a comma..

Status Column Codes

Code	Description

The designations AB, AC, AD, AE, AF, AI, BI, CI, DI, and FI can be used, but are optional because criteria Aand I may support entry on their own. The designators listed below are consistent with the criteria required for entry of a GMC record:

Code	Description

UNIFORM OFFENSE CODES

TABLE OF CONTENTS

1--UNIFORM OFFENSE CLASSIFICATIONS IN THE OFFENSE (OFF), ORIGINAL OFFENSE CODE (OOC), AND CONVICTION RESULTING IN REGISTRATION (CRR) FIELDS

2--OFFENSES OF GENERAL APPLICABILITY

3--OFF, OOC, AND CRR FIELD CODES

SECTION 1--UNIFORM OFFENSE CLASSIFICATIONS IN THE OFFENSE (OFF), ORIGINAL OFFENSE CODE (OOC), AND CONVICTION RESULTING IN REGISTRATION (CRR) FIELDS

The codes on the following pages are the NCIC Uniform Offense Classifications for use in the OFF, OOC, and CRR Fields.

When the offense codes (except as noted) are used, free text or easily understood abbreviations further explaining or describing the offenses may be entered in the Miscellaneous (MIS) Field or in positions 5 through 24 of the OFF Field.

When the offense is followed by the parenthetical wording "identify type of institution" or "specify conduct," free text describing the institution or specifying the actions which constitute disorderly conduct should be entered in the MIS Field or in positions 5 through 24 of the OFF Field.

When the offense is followed by parenthetical wording such as "identify weapon" or "identify object," entry of free text to describe same is optional in the MIS Field or in positions 5 through 24 of the OFF Field.

SECTION 2--OFFENSES OF GENERAL APPLICABILITY

When the substantive offense is conditioned by one of the following offenses of general applicability, the appropriate wording below (or easily understood abbreviations) must be placed in the MIS Field or in positions 5 through 24 of the OFF Field so the inquiring recipient of the record will know that the substantive offense has not been charged:

General Offense

Accessory After the Fact

Accessory Before the Fact

Aid/Abet

Assault to Commit

Attempt to Commit

Conspiracy to Commit

Facilitation of

Solicitation of

Threat to Commit

SECTION 3--OFF, OOC, AND CRR FIELD CODES

In all positive responses containing a Wanted Person File record, the offense code will translate as set out with the exception of the parenthetical instructions. For example, in a wanted person record response where the offense is coded 0902, the translation will read "OFF/HOMICIDE - WILLFUL KILL - FAMILY - WEAPON". Positions 5 through 24 of the OFF Field may be used to further describe the offense. The free text will be provided in a response.
