

# Accelerated Learning Funding Recommendations

LC 274 establishes statewide standards and funding mechanisms for accelerated college credit programs for high school students. This chart articulates the funding that will be allocated for dual credit courses and advanced placement (AP) and International Baccalaureate (IB) courses.

## Dual Credit Courses

State continues to fund ALL dual credit courses through general fund ADM earned by high schools. Funding is to be shared with colleges via MOU (range from \$15 to \$90 per credit). Colleges earn FTE for dual credit courses unless enrollment is capped.

High schools receive an additional \$20 per credit for the first 9 dual credits earned by students. The funds are shared evenly with postsecondary partners to help pay for textbooks, biennial reporting, student supports/advising, and regular meetings of educators to ensure college rigor and student success.

High schools earn an additional \$10 for first 9 dual credits earned by students from low-income families or students of color traditionally underrepresented in postsecondary education to help develop and offer instructional student skill supports; fund a course that provides an orientation to college; and expand earlier awareness/advising for students and their families of college credit options.

High schools receive an additional \$10 per credit for first 9 Career and Technical Education dual credits earned by students to help cover costs of textbooks and materials.

## Advanced Placement (AP) and International Baccalaureate (IB) Courses

State general fund pays ADM earned by high schools for ALL Advanced Placement and International Baccalaureate courses offered.

High schools receive an additional \$10 per credit for first 9 credits of AP or IB earned by students from low-income families or students of color traditionally underrepresented in postsecondary education to develop and offer instructional student skill supports; fund a course that provides an orientation to college; and expand earlier awareness/advising for students and their families of college credit options.

High schools receive an additional \$10 per credit for first 9 AP or IB credits earned by students for textbooks and materials.
