Mr. Whitman,

We received your report of the D.L.C.D. on Urban and Rural Reserves, September 30th, 2010. We are objecting to your decision on area 9A, which was put in the same designation as area 9D and 9F; these areas are completely out of the area of 9A.

According to your Metro Urban and Rural map, the 9A area is bounded by the urban growth boundary on the west, Urban Reserves on the south and east. The properties at 2910 and 2930 NW McDaniel Road slope to the Forest Heights boundary on the south and the east, while the Multnomah / Washington County line is on the west. The area is completely residential and growing.

In the Multnomah Report on August 13th, 2010, it stated the County did not consider this area in isolation, but rather as part of the greater map area. These properties are completely landlocked from the greater map area as proposed by Multnomah County and approved by Metro.

We feel that because we are located on the western end of Multnomah County, the county and city don't want anything to do with the properties located in this area, because they cannot provide the facilities.

There should be some common sense in deciding land use policies in the tri-county areas.

Thank You for Your Time,

Handwritten signatures in black ink. The first signature is "John Cherry" and the second is "Judy Cherry".
