

Certification & Audit Services

The Oregon Department of Agriculture (ODA) offers certification and auditing services to address both compulsory and market needs for producers, handlers, and processors of agricultural products. Certifications are developed in concert with industry groups and may be customized according to company needs.

These include:

- Identity preserved programs
- Pesticide residue certification and testing
- Secured storage

ODA auditors are located throughout the state of Oregon and are trained to provide quality auditing with exemplary customer service to promote the agricultural industry. Customized auditing services are available upon request.

Market Access & Certification
Providing quality services that ensure Oregon commodities meet or exceed requirements of the marketplace.

Sampling. Grading. Inspecting. Auditing.
