00225.16 – PVMS / PCMS - Portable Changeable Message Sign – Truck Mounted

ODOT maintains a list of truck mounted changeable message signs. These are temporary traffic control devices with the flexibility to display a variety of messages.

There are other documents that describe the procedure followed during the evaluation process.

- Attachment A is a list of our Specifications for this device. You must demonstrate in writing prior any on-site evaluation that your device meets our Specifications.
- Attachment B is a form that requires the manufacturer to certify that his product meets our Specifications. One copy of this must be completed, signed, and submitted for each product the manufacturer would like to have evaluated.

ODOT does not regularly evaluate Message Boards. Every few years vendors will be invited to bring their product(s) to a group evaluation, on an as needed basis. If you have a product you wish ODOT to evaluate, submit a written request complying with the following:

To apply for inclusion on the QPL, submit the following:

- Preliminary Information for Product Evaluation Form.
- Eight (8) copies of the Specification Data Sheet / Brochures
- Four (4) copies of other detailed data as needed to confirm this device meets our Specifications.
- Four (4) copies of the Operating and Maintenance manuals.
- List of limitations and precautions.
- One (1) copy of a completed and signed Attachment B.

After we have reviewed and approved your submittal you will be added to the list for the next group evaluation. At this group evaluation you will be allowed to bring a demo unit and a knowledgeable technician. You will be notified 4 to 6 weeks prior to the group evaluation. After completion of the group evaluation a summary of the results will be brought to the full QPL Committee and you will be notified of the results.

A full description of the group evaluation can be found in Attachment C.

Submit documentation to:
