00225.13 – Tape, Temporary Non-Removable

ODOT maintains a list of products suitable for placement on concrete or asphalt surfaces to temporarily delineate the roadway. We have two categories, Temporary Removable, and Temporary Non-Removable. This Product Review Guideline covers only the Non-Removable types. The Removable tape is covered by another Product Review Guideline.

Our requirements for the non-removable version are that it should offer good delineation, day and night, for an extended period.

To apply for inclusion on the QPL, submit the following:

- Preliminary information for Product Evaluation Form.
- Spec data sheet.
- Detailed installation instructions.
- List of limitations and precautions.
- Submit samples for examination (4 each 10" samples of each color.)
- Other DOT approvals (with contact information).
- Copies of independent testing you have done.
- Copies of NTPEP testing you have done.

Submit documentation to:
Oregon DOT - Materials Lab
