## **00225.13 – Tape, Temporary Removable**

ODOT maintains a list of products suitable for placement on concrete or asphalt surfaces to temporarily delineate the roadway. We have two categories, Temporary Removable, and Temporary Non-Removable. This Product Review Guideline will cover the Temporary Removable types. The Non-Removable types are covered by another Product Review Guideline.

Our requirements for the removable version is that it should offer good delineation day and night for an extended period and be easily removed without leaving any residue on the highway.

To apply for inclusion on the QPL, submit the following:

- Preliminary information for Product Evaluation Form.
- Spec data sheet.
- Detailed installation instructions.
- List of limitations and precautions.
- Submit samples for examination (4 each 10" samples of each color.)
- Other DOT approvals (with contact information).
- Copies of independent testing you have done.
- Copies of NTPEP testing you have done.

Submit documentation to:

Oregon DOT
