

ACEC July 15, 2016

By Gary Holeman

Where are we at

- ODOT's IT infrastructure is in place, except for the Gateway
- ODOT's ProjectWise configuration is in place for the internal rollout.
- ODOT is finalizing some policies, practices, and guidance.

What are our future goals

- Finish internal deployment
- Finish testing the Gateway for external access.
- Vet our straw model for gaining access with externals
- Future additions to the environment
 - Geospatial
 - Pointclouds?

What will we expect from our partners in the consulting and construction worlds?

- We will be looking for resources to test access
- I expect that we will be looking for a Pilot project before full rollout.
