

Mt. Hood Multimodal Transportation Plan
PROJECT CHARGE
Final Approved by PLT 3/9/12

Based on guidance outlined in the 2009 Omnibus Public Lands Bill and from the Oregon Transportation Commission, and in a partnership among ODOT, Forest Service-Mt. Hood National Forest, Clackamas and Hood River Counties (Partners), in cooperation with FHWA-Western Federal Lands Highway Division, the goal is to develop a transportation Plan for the Mt. Hood Highway/US 26-OR 35 corridor to and through the northern portion of the Mt. Hood National Forest.

This planning effort will strive for affordable and achievable solutions by focusing on:
1) improving highway safety for all users and; 2) on expanding travel options year round to enhance mobility and access to recreation and rural communities.
