Subject: Support for STIP projects E61, E62 & E87

I am writing in support of STIP Enhance applications:

E61 -- freight & multimodal improvements on NE 238th from Halsey to Glisan. I'm a community member who served on the East Metro Connections Plan Steering Committee, and these improvements are a top priority for East Multnomah County. This particular roadway is the weak link in East County's north-south connections. The limitations of existing roadway (1) force freight traffic onto other connectors that are less appropriate for that type of traffic and (2) create a very unsafe situation for bikes and pedestrians.

E62 -- freight & multimodal improvements on Sandy Blvd. from the Gresham/Fairview city limits to 210th. This is another project supported by East County jurisdictions because it improves freight movement and multimodal safety in a key industrial area for our region.

E87 -- Powell-Division Corridor Safety & Access to Transit. Improving east-west transit service along the Powell/Division corridor is a high priority project for the Metro region. Metro is just starting a study of transit improvements along this corridor to make sure they meet the needs of the community and funding E87 will allow TriMet to implement the recommended improvements.

Thank you for your consideration.
