

U.S. 26: Brookwood Parkway/Helvetia Interchange

A Jobs and Transportation Act Project

August 2013

Project summary

ODOT started construction in August 2013 on the U.S. 26: Brookwood Parkway/Helvetia Interchange project. This modernization project will improve traffic flow and safety in the interchange area. Completion is slated for summer 2015. Project elements include:

- Constructing a new westbound U.S. 26 to southbound Brookwood Parkway exit loop ramp
- Reconstructing the westbound U.S. 26 entrance ramp from Helvetia Road
- Widening the Brookwood Parkway overcrossing to accommodate additional northbound and southbound lanes over U.S. 26
- Extending the right-turn lane from northbound Brookwood Parkway to the eastbound U.S. 26 entrance ramp
- Adding sidewalks and bike lanes within the interchange area

Traffic impacts & schedule

There are seven stages of construction. At several times, drivers will experience traffic shifts and new traffic patterns in the interchange. **During all seven stages, there will be intermittent nighttime lane closures on Brookwood Parkway, Helvetia Road, U.S. 26 and the on- and off-ramps.** Daytime work will be behind barriers and all lanes will be open. Please use caution and follow all construction signage.

- **Stage 1** (August 2013 through fall 2013): Work includes building a new section of Jacobson Road to connect to Helvetia Road farther north, building a new culvert across Helvetia Road, ramp widening and bridge work. **Groveland Drive where it intersects with Helvetia Road will permanently close.** Drivers on Groveland Drive heading for Helvetia Road can take Groveland Road to West Union Road. Crews will remove approximately 160 small and large trees in the northwest and northeast quadrants of the interchange to prepare for widening and ramp work. At the end of Stage 1, the current connection to Jacobson Road from Helvetia Road will close and the new connection will open. **Traffic impacts: Starting at 8 p.m. Friday, Sept. 13, and ending at 5 a.m. Monday, Sept. 16, Helvetia Road will be closed between Jacobson Road and Schaaf Road in both directions for culvert installation.** A signed detour will be in place. Expect daytime flagging on Jacobson Road and nighttime lane closures in the interchange.
- **Stage 2** (fall 2013 through spring 2014): Work includes widening Helvetia Road and Brookwood Parkway, building a retaining wall, widening the ramps on the east half of the interchange and installing new sign structures and bridge girders on U.S. 26. **Traffic impacts:** U.S. 26 under Brookwood Parkway will be entirely closed for 1-2 nights while the new bridge girders are delivered and installed. During the highway closure, traffic will be routed onto the Brookwood Parkway off-ramps and back to the highway using the Brookwood Parkway on-ramps. Expect intermittent nighttime lane closures and daytime work behind barriers.
- **Stages 3 & 4** (spring 2014 through fall 2014): Work includes building new ramps from U.S. 26 westbound and widening the overpass. **Traffic impacts:** Intermittent nighttime lane closures and daytime work behind barriers.
- **Stage 5** (fall 2014): The new on-ramp to U.S. 26 westbound, farther north than the current ramp, will open. Work includes removing the former westbound off-ramp, completing work on the new off-ramp from U.S. 26 westbound to Brookwood Parkway southbound, and widening on Helvetia Road and Brookwood Parkway. At the end of this stage, the new off-ramp from U.S. 26 westbound to Brookwood Parkway southbound will open. The current off-ramp from U.S. 26 westbound will convert to use for northbound traffic on Helvetia Road only. **Traffic impacts:** Intermittent nighttime lane closures and daytime work behind barriers.
- **Stage 6** (winter 2015): Work includes widening the existing U.S. 26 westbound off-ramp. Traffic will be in its final configuration at the end of this stage. **Traffic impacts:** In addition to intermittent nighttime lane closures, there will be a full weekend closure (8 p.m. Friday to 5 a.m. Monday) of the existing off-ramp from U.S. 26 westbound. During the closure, the newly opened ramp from U.S. 26 westbound to Brookwood Parkway southbound will be open. There will be a signed detour for drivers heading north on Helvetia Road. When the ramp is reopened, there will be two off-ramps from U.S. 26 westbound: one for Helvetia Road heading north and one for Brookwood Parkway heading south.
- **Stage 7:** (spring 2015 through summer 2015): Work includes final paving, striping and cleanup work. **Traffic impacts:** Intermittent nighttime lane closures and daytime work behind barriers.

Nighttime noise

Work on this project will take place during the day and night. ODOT has obtained nighttime noise variances from the City of Hillsboro and Washington County. Residences and businesses adjacent to the project area may experience construction noise. A phone number is available for reporting noise problems or incidents requiring immediate attention. That number is 503-646-0231.

U.S. 26: BROOKWOOD/HELVETIA INTERCHANGE

A Jobs and Transportation Act Project

U.S. 26: Brookwood Parkway/Helvetia Interchange Open House

Wednesday, Sept. 11, 2013
5 to 7 p.m.

Hillsboro Public Library Community Room
2850 NE Brookwood Parkway
Hillsboro, OR 97124

The public is invited to stop in at any time during the open house. ODOT team members will be on hand to discuss project details, traffic impacts and the construction schedule.

Accommodations will be provided to persons with disabilities. If a sign language interpreter is needed, please call (503) 731-8247 or TTY (800) 735-2900 48 hours prior to the meeting.
