## TRAFFIC ADVISORY

### I-84 and I-205 interchange closures next week

*Paving requires nighttime ramp closures and lane closures on I-205*

A contractor for ODOT is repairing pavement in several locations along Interstate 205 between Interstate 84 and the Borland Road Bridge (about a mile east of the Stafford Rd. exit). This work requires interchange closures and lane closures each night Monday, April 1 through Friday, April 5 from 10 p.m. to 5 a.m.

**This schedule could change:** it depends on both weather conditions and work progress.

#### **Monday, April 1 and Tuesday, April 2 from 10 p.m. to 5 a.m. each night:**

Only one ramp will close at a time. During ramp closures, travelers will follow a signed detour.

- **I-84 westbound to I-205 southbound ramp will close**  
Detour: take the I-205 northbound off-ramp to the Sandy Boulevard off-ramp (exit 23A); merge into the left eastbound lane on Sandy; turn left on U.S. 30 (Killingsworth Avenue); turn left onto the on-ramp to I-205 south.
- **I-84 eastbound to I-205 southbound ramp will close**  
Detour: take the I-205 southbound off-ramp (exit 6) and head toward Glisan Street; cross Glisan Street to the on-ramp to I-205 south.
- **I-205 southbound Division Street on-ramp will close**  
Detour: continue along the I-205 frontage road to U.S. 26 (SE Powell Boulevard); turn right onto westbound Powell Boulevard; turn left onto southbound 92nd Avenue; turn left onto eastbound Foster Road to the I-205 southbound on-ramp.

**Wednesday, April 3 through Friday, April 5 from 10 p.m. to 5 a.m. each night:** The contractor will close one lane of I-205 southbound to work at three locations between the Abernethy Bridge and Borland Road.

Travelers should watch for crews working in the roadway and slow down in the work zone.
