LAND USE

For the purpose of identifying the existing land uses and regulatory requirement in the area affected by the Sunrise Project, Clackamas County staff conducted a detailed land use inventory of the area during April and May, 2006. The results of this inventory of the land use study area are reported in this Technical Report. In addition to the field inventory, the County Staff consulted the following documents, plans and websites to obtain information on existing and future land uses in the land use study area:
