## GLOSSARY

Definitions of abbreviations and terminologies used in this publication.

**ADT:** Average Daily Traffic - The total traffic for the year divided by 365. In most cases, the ADT is obtained by adjusting a 48-hour traffic count by applying monthly factors developed from permanent traffic recording stations.

In section I, an asterisk (\*), appearing to the right of a count location description, indicates the location of a permanent traffic recorder station.

Asterisks (\*\*\*\*), appearing in Section II, under "Historical Traffic Data", indicates recorder was inoperative during those time periods.
