

OPEN DISCUSSION AND FUTURE TOPIC IDEAS

- NextGen means more and more terminology. It gets confusing. Looking to OEM to provide resources and support
- Give/take of data evaluation and feedback provided by OEM was valuable.
- GIS User Groups. Touring and becoming familiar with PSAPs
- Various PSAPs/Dispatchers want their map to look and perform differently
- For next year, more local success stories and challenges (i.e., like Chad's presentation)
- More information and an update on Standards (national/local)
- Would like overview of what WA State is doing to prepare for NG9-1-1
- How different states are preparing for NG. Best Practices. Maybe not enough data yet. Success stories vs. Mistakes.
- Would like the telcos (Sprint, Verizon, etc.) to report on early adopters of text-2-911 solutions
- Vesta 4.2 capable of receiving Text
- Who's going to be making the text application? What does it do? What does it look like? What is NENA's role?
- How will Free-Texting over VOIP work?
- What is status of ESN Renumbering Project?
- Looking for status report on various GTAC projects
- PSAP Jurisdiction Layer needs to be a key effort of OEM and 9-1-1 partners
