

OREGON OFFICE OF EMERGENCY MANAGEMENT

Geologic Hazards Preparedness Speakers

Want to request a speaker to present to your group on preparing for Oregon's geologic hazards?

- Oregon Office of Emergency Management can provide briefings on the hazards of the Cascadia Subduction Zone, the Oregon Resilience Plan, and how to prepare your community or business to be resilient to geologic hazards.
- Our emphasis is to work to educate decision- and policy- makers who will lead their businesses and communities in preparedness and mitigation efforts. We can work with your agency to schedule a briefing or other outreach.
- We can provide a speaker for general public audiences of over 100 people. We simply don't have the resources to fulfill the need for everyone who asks for a presentation. You can ask your local fire department or Red Cross chapter for help on general preparedness.
- If the distance to the presentation location requires the overnight stay of the speaker, the requesting agency will reimburse OEM at the standard GSA rate. There will be no charge for the actual presentation.

Possible topics:

- General Cascadia Subduction Zone hazards and impacts to Oregon
 - 45 minute presentation
 - 15 minutes Q&A
