Re: Jordan Cove Energy Project L.P. -- 401 Water Quality Certification Request

Dear Ms. Camarata and Mr. Stine:

I am submitting this letter to you on behalf of the Jordan Cove Energy Project L.P. (“Jordan Cove”). As you know, Jordan Cove, and the Pacific Connector Gas Pipeline have applied to the U.S. Army Corps of Engineers for authorization under Section 404/10 of the Clean Water Act for construction of an LNG export terminal, an associated slip/access channel and a natural gas pipeline extension to serve the Jordan Cove Energy Project proposed to be located in Coos Bay, Oregon (the “Project”). Under DEQ regulations, these requested authorizations to the Corps also constituted a request to DEQ for certification of the proposed project pursuant to Section 401 of the federal Clean Water Act. In order to provide DEQ with additional time to consider certification of the Project, Jordan Cove hereby withdraws its pending request for Section 401 certification and hereby resubmits, as of the date of this letter, its request for certification of the Project pursuant to Section 401. This request for certification is based on the pending application to the Corps and other information regarding the Project previously provided to DEQ.

Because Jordan Cove’s request for certification is not based on any change to the proposed project and is intended only to allow DEQ additional time to consider Jordan Cove’s certification request, Jordan Cove understands that DEQ’s pending review of the 401 certification authorization will not begin anew or otherwise be affected by this request. In particular, Jordan

Cove understands that public notice and comment processes completed to date will not need to be repeated.

Thank you for considering Jordan Cove's request for certification. Please let me know if you have any questions or concerns. My office telephone is (713) 400-2809 or you may contact me via e-mail at bfowler@vereseninc.com.

Sincerely,

A handwritten signature in blue ink, appearing to read "William Fowler", written in a cursive style.
