Next Meeting: **April 7, 2016, 1:00 – 4:30 p.m.**
Transformation Center Training Room
Lincoln Building, Suite 775
421 SW Oak Street
Portland, OR

Vision: HIT-optimized health care: A transformed health system where HIT/HIE efforts ensure that the care Oregonians receive is optimized by HIT.

Three Goals of HIT-Optimized Health Care:

- Providers have access to meaningful, timely, relevant and actionable patient information to coordinate and deliver “whole person” care.
- Systems (health systems, CCOs, health plans) effectively and efficiently collect and use aggregated clinical data for quality improvement, population management and incentivizing health and prevention. In turn, policymakers use aggregated data and metrics to provide transparency into the health and quality of care in the state, and to inform policy development.
- Individuals and their families access their clinical information and use it as a tool to improve their health and engage with their providers.
