

Program Overview

The Oregon Council of Clinical Innovators is a statewide, multidisciplinary cadre of innovation leaders, consultants and mentors who are actively working with project teams to implement health system transformation projects in their local communities

The Council of Clinical Innovators is guided by a steering committee of Oregon health care leaders and is supported by the Oregon Health Authority Transformation Center through funding from the State Innovation Model (SIM) grant.

Clinical Innovation Fellows

Through participation in a year-long learning experience with emphasis on health system transformation projects in their local communities, this select group of Clinical Innovation Fellows is developing and refining skills in leadership, quality improvement, implementation and dissemination science that creates a network of expertise supporting the Oregon coordinated care model.
