

# Columbia Gorge CCO Model

- PacificSource is the CCO of record
- Holds contracts with providers
- We succeed or fail together

- > 50% at risk entities
- Sets operational standards
- Steward of financials, incentives, contracts & CCO funded resources
- Latitude beyond CCO scope (e.g. uninsured)

- > 50% consumer voting members
- Steward of the community needs and Health Improvement plan
- Champions community priorities

- Co-chairs = primary + behavioral clinicians
- Steward of best clinical practices
- Clinical standards within community
- Implementation of clinical priorities

# Community Advisory Council Overview

- Charter: Be a broad reaching CAC for region
  - Provide tangible member feedback on Columbia Gorge CCO services and programs
  - Be available for organizations beyond the traditional Oregon Health Plan/Medicaid services seeking member input on program and process designs
  - Identify topics of concern from the Community Health Assessment
  - Amplify the impact of agencies and healthcare providers by convening all participants on a specific focus area
  - Improve community integration by connecting organizations
- Results:
  - Collaborative CHA & CHIP
  - \$150,000 of Transformation Fund Projects
  - Growing trend of consumer participation in design

# Clinical Advisory Panel Overview

Charter: Engage providers in the region for a one-voice approach to:

- Define optimal delivery of care utilizing all community health systems
  - Identify funding for innovative programs while reducing over-utilization
  - Patient-centered standards, guidelines and protocols for delivery of care; metrics
  - Provider development and support; Input on credentialing and privileging
  - Payment mechanisms which support the CCO care model
- Results:
    - Adopted Choosing Wisely – reduces over-utilization test
    - Adoption of One Key Question (OKQ) protocol – pre-pregnancy
    - Replaced Sports Physicals with Adolescent Well Care Visits
    - Special handling of kids entering foster care
    - Sharing results of clinical measures across clinics
