Subject: New Values to Code Tables

AMH is adding some new values to the Veteran and Living Arrangement fields effective 10/1/2015. The GAF Score field will become optional on 10/1/2015 when the ICD-10 codes are required. Client Entry submitters will use the new Veteran and Living Arrangement values beginning 10/1/2015, because they will be included in the field drop-down boxes. We understand that facilities that submit data to MOTS via EDI will need time to update their systems. Since system updates may incur a cost, AMH wanted to be sure you have all of the information early in order to decide if adding it to your ICD-10 systems changes would make sense for your business. A 90 day transition time will be in place, so you could begin using the new values as early as 10/1/2015 or as late as 1/1/2016. AMH will require the new values beginning 1/1/2016.

Veteran Status: The Veteran values will include new values and will retain all of the current values. The current 'Yes' value is better defined, but not significantly changed in the new values. These new values were requested by the Veterans' Administration, so they can track the types of mental health and substance abuse services veterans are seeking and where in the state more veterans services may be needed. AMH is only providing aggregate data, not client specific data to the Veterans Administration. The new values and current values with better definitions are attached to this email.

Living Arrangement: The additional Living Arrangement values are being added in order to better track services to children and young adults in transition in various living situations and to meet state and federal reporting requirements. These new Living Arrangement values with the definitions are attached to this email. There may be minor clarifying changes to some Living Arrangement definitions, but all of the new code values will be added to MOTS.

If you have any questions or concerns, please email them to MOTS.Support@state.or.us.

Effective 10/1/2015
