Subject: September 4 reprocessing of some fee-for-service (FFS) physician-administered drug claims

The weekend of September 4, 2015, the Division of Medical Assistance Programs (DMAP) will reprocess a small number of physician-administered drug (PAD) claims for payment dates **January 1, 2010**, through **December 31, 2010**. We are writing to you to let you know why this activity is happening and how this reads on your remittance advice (RA) from DMAP.

Why is this happening?

The Deficit Reduction Act of 2005 requires state Medicaid programs to capture and report the National Drug Code (NDC) for all outpatient FFS PAD claims beginning January 1, 2008.

On July 1, 2011, our system was updated to do this; however, we now need to reprocess PAD claims with the payment dates listed above so that all PAD claims are correctly reported.

What should you do?

No action is required on your part. For some providers, this activity may result in additional payments. For others, if this activity results in a recovery, we will prevent any recoupments from occurring.

What you will see on the paper remittance advice

The Claim Adjustments section will list the affected claims by original Internal Claim Number (ICN).

- Each ICN will have an adjustment ICN (beginning with “52”) to indicate reprocessing activity.
- The “Detail EOBs” will list Explanation of Benefits (EOB) code *EOB 8136 – DHS initiated adjustments due to processing error.*

What you will see on the electronic remittance advice (ERA) or Provider Web Portal

In both the ERA and Provider Web Portal, the reason for the reprocessing will be *Adjustment Reason Code 0084 – Prior processing information appears incorrect.*
