### ED Care Guidelines from Ford Medical Center

Last Updated: Wed Nov 17 10:35:40 MDT 2014

2 other facilities are applying these Care Guidelines in their EDs.

### Security Alert:

Patient has posed a security threat in the past, and has been escorted off the premises by security on multiple occasions. If the patient becomes aggressive, call the security desk at 385-555-1246.

### Care Recommendation:

**Pain contract and scheduled substance prescribing:** Patient had a controlled substance agreement with Dr. Smith but Dr. Jamison. **Dr. Jamison prescribes regular 1 mg Clonazepam, 1 mg Lorazepam, and hydrocodone as needed.** Please do not use controlled substances in the ER unless there are new objective findings.

### History of Behavioral Health Conditions:

**AXIS I:** Bipolar disorder, type I, hypomanic. History of PTSD. **AXIS II:** Borderline personality features. 12/4/13 per John Johnson, MD

### Radiation Alert / Pertinent Imaging Results:

14 CT scans on record from 2007 to 5/12/14 and numerous radiology exams.

### Additional Information:

1. Limit comfort/convenience items, unless medically indicated
2. Do not bed and gown, unless indicated ("keep vertical patients vertical")
3. No opiates in the ED for chronic pain or opiate withdrawal.
4. No opiate or benzodiazepine prescriptions at discharge.
5. Strongly encourage or assist Pt in making a PCP appointment prior to d/c. At this time, Pt has no outpatient prescriber for his insulin.
6. Contact patient's outpatient providers regarding patient's visits to the Emergency Department and suggestions for coordination of treatment planning.

These are guidelines and the provider should exercise clinical judgment when providing care.
