### **Oregon Public Health Division lifts advisory for Fish Lake in Jackson County**

#### ***Reduced blue-green algae levels confirmed***

A health advisory prompted by high algae levels found in Fish Lake, located 30 miles east of Medford, was lifted today by Oregon Health Authority's Public Health Division.

The advisory went into effect July 1, 2011.

Water monitoring has confirmed reduced levels of blue-green algae that can produce toxins harmful to humans and animals. These reduced levels are not likely to be associated with dangerous toxin concentrations in the water, according to World Health Organization guidelines.

Oregon health officials advise people who recreate in Oregon water bodies to always be alert to signs of algae blooms. People and their pets should avoid water contact if there are visible clumps of algae in the water.

For local information contact the Rogue River-Siskiyou National Forest, High Cascades Ranger District office at 541-865-2700 or 541-560-3400.

For health information, contact the Harmful Algae Bloom Surveillance program at 971-673-0400 or [www.healthoregon.org/hab](http://www.healthoregon.org/hab); also contact the Oregon Public Health toll-free information line at 1-877-290-6767.
