

Appendix A: Demographic and Social Trend Analysis

For Oregon Parks and Recreation Department

Prepared by

Population Research Center

Portland State University.

October 2007.

Introduction

This report presents population projections and estimates for Oregon, its counties and for selected incorporated cities, for the period 2000 to 2020. The projections are benchmarked to 2000 census results for the city and county populations, except for the projections created from the Behavioral Risk Factor Surveillance System data and Oregon Healthy Teens survey.

The forecasts in this report are based on assumptions developed from analysis of historical trends and expectations of the future. While the past gives some indication of what is likely to happen in the future, there always the possibility of unforeseen events that could have a significant impact of population change. Thus, users of these projections should be aware that new changes could occur and that it is wise to evaluate projections periodically in future years.

Given that these projections are developed for long-term trends, they are conservative. This means that they do not assume drastic changes to the population trends.

Methods and Assumptions

All projections use the 2005 population estimates, produced by the Population Research Center for the State of Oregon, as the benchmark population. The estimates are considered the benchmark for Oregon's population and have been developed to be as accurate as possible.

We use two methods to project city and county populations: 1) Share-of-Growth method for projecting county population size and 2) Shift-Share projections for the total city population and all other sub-county categories, by five years intervals, from 2010 to 2020.

The Share-of-growth method is that the focus is on shares of population growth rather than population size. It provides a more reasonable projection because it assumes that the smaller area (county) population growth will be the same over the projection horizon as it was during the base period.

Shift-share method accounts for changes in population shares over time. In particular, we assume here that the influences of population change (fertility, mortality, and migration) are similar in Beaverton, Hillsboro, and Tigard cities and surrounding Washington County. So, rather than make detailed assumptions about local mortality, fertility, and migration levels for the city populations, we can presume a link between population changes in the county and the cities located in their particular county.

Projection Methods, 2010-2020

Total County/State

Data: 2000 US Census, and 2005 estimates from the Population Research Center and projections from Office of Financial Management (OFM).

Methods: Shift-Share¹ method was used to create State projections based on 2005 estimates and then compared OFM projections (which are based on 2003 population estimate). OFM county projections were then raked to the new state projections.

Total City (for selected cities)

Data: 1990, 2000 US Census, and 2005 estimates from the Population Research Center

Methods: Shift-Share¹ method was used to calculate these projections.

Five year Age groups, County

Data: OFM projections and 2005 estimates from the Population Research Center

Methods: OFM projections were used as a base for all projections. State by age was raked to each years total population and then all counties were raked to county and age totals.

Youth 6-11 years and 12-17 years; County and Selected Cities

Data: 1990, 2000 US Census, and 2005 estimates from the Population Research Center

Methods: Share-of-Growth¹ method was used for county projections and Shift-Share¹ method was used for city projections.

Adults 60 and over; County and Selected Cities

Data: 1990, 2000 US Census, and 2005 estimates from the Population Research Center

Methods: Share-of-Growth¹ method was used for county projections and Shift-Share¹ method was used for city projections.

Hispanic, Black, and Asian/PI; County and Selected Cities

Data: 1990, 2000 US Census, and 2005 estimates from the Population Research Center

Methods: Share-of-Growth¹ method was used for county projections and Shift-Share¹ method was used for city projections.

Suggestions for Priority Counties

1. Increase in aging population 60 years and older

To be considered a high priority county, counties must have had at least 9 percent of the states population in 2005, or at least 10 percent of the population in 2015, or 20 percent change in 2015.

Priority counties: Benton, Clackamas, Columbia, Crook, Deschutes, Lane, Multnomah, and Washington

2. Increase in youth population between the ages of 6-17

To be considered a high priority county, counties must have had:

¹ State and Local Population Projections, Smith, S., et al., Shift-Share: Trend Extrapolation Methods, Chapter 8:178-180.

Ages 6 to 11- over 8 percent change or more than 10 percent of the total state population.
Ages 12 to 17- over 8 percent change in 2015 or 2020 or more than 10 percent of the total state population.

Priority counties: Clackamas, Crook, Deschutes, Jefferson, Lane, Marion, Morrow, Multnomah, Washington and Wheeler.

3. Increase in population diversity for Hispanic ethnicity and Black, Asian/Pacific Islander races. To be considered a high priority county, counties must have had:

a. Hispanic- over 15 percent change in 2015 and 2020 or over 10 percent of the total state population.

Priority counties: Clackamas, Deschutes, Lincoln, Marion, Morrow, Multnomah, Sherman, Tillamook, Washington and Wheeler.

b. Asian/Pacific Islander- over 15 percent change in 2015 and 2020 or more than 10 percent of the total state population.

Priority counties: Clackamas, Deschutes, Jackson and Washington.

c. Black- over 20 percent change in 2015 and 2020 or over 10 percent of the total state population.

Priority counties: Deschutes, Washington and Multnomah.

4. Adult population meeting CDC physical activity recommendations.

To be considered a high priority county, counties must have had:

Less than 50% of the adult population (18+) meeting the CDC recommendations² (in 2010) and those counties that have a negative trend over time with less than 50% in 2020.

Priority counties: Baker, Columbia, Crook, Douglas, Harney, Hood River, Josephine, Morrow, Tillamook, Umatilla and Wallowa.

Suggestions for Priority Cities

Method for City Selections

Key:	Total Population	Special Population
	1990: X ₁	1990: Y ₁
	2000: X ₂	2000: Y ₂

High priority cities for aging, diversity, and youth were selected based on three variables:

- 1) Relative percent change- special population (2000) divided by total population (2000); minus 1990 special population divided by total population (1990).

Formula: $(Y_2/X_2) - (Y_1/X_1)$

- 2) Absolute change- 2000 special population minus 1990 special population.

Formula: $Y_2 - Y_1$

² US Center for Disease Control (CDC) physical activity guidelines of moderate intensity physical activities for at least 30 minutes on 5 or more days a week.

- 3) Absolute percent change- 2000 special population divided by 1990 special population; minus 1.

Formula: $(Y_2/Y_1) - 1$

1. Increase in aging population 60 years and older

Priority cities: Albany, Aumsville, Beaverton, Bend, Eugene, Florence, Gresham, Hillsboro, Keizer, Lakeside, McMinnville, Medford, Oregon City, Richland, Salem, Tigard and Troutdale.

2. Increase in youth population between the ages of 6-17

Priority cities: Albany, Banks, Barlow, Beaverton, Bend, Boardman, Coburg, Creswell, Donald, Eugene, Fairview, Gresham, Happy Valley, Helix, Hillsboro, Medford, Oregon City, Portland, Redmond, Salem, Sherwood, Tigard, Wilsonville and Woodburn.

3. Increase in population diversity

- a. Hispanic ethnicity diversity

Priority cities: Albany, Beaverton, Bend, Boardman, Canby, Cornelius, Corvallis, Eugene, Fairview, Forest Grove, Gervais, Gresham, Hermiston, Hillsboro, Hood River, Hubbard, Irrigon, Keizer, Lafayette, Madras, McMinnville, Medford, Milton-Freewater, Newberg, Ontario, Portland, Salem, Springfield, Stanfield, Tigard, Tualatin, Umatilla, Wilsonville, Wood Village and Woodburn.

- b. Asian/ Pacific Islander race diversity

Priority cities: Beaverton, Bend, Corvallis, Eugene, Fairview, Forest Grove, Gresham, Happy Valley, Hillsboro, Keizer, Lake Oswego, Medford, Portland, Salem, Sherwood, Springfield, Tigard, Troutdale, Tualatin, West Linn, and Wilsonville.

- c. Black race diversity

Priority cities: Albany, Ashland, Beaverton, Cornelius, Eugene, Fairview, Gladstone, Gresham, Hermiston, Hillsboro, Keizer, McMinnville, Medford, Milwaukie, Monmouth, Oregon City, Portland, Salem, Springfield, Tigard, Troutdale, Tualatin, Umatilla and Wilsonville.
