Results of the Survey

Phase I Agenda

Brief Review of Phase I, Phase II and Phase III assessments and their importance

New business:

**- New Training Focus -**

**Part I Ammonia Safety Training** - We are going to start working our way through the Transcaer Anhydrous Ammonia Safety training series. This excellent series is 3 hours long so we will bring 1/3 of it to you at a time.

**To start it off we are going to be calling the NRC LIVE, and report a fictional Ammonia release and broadcast it for all to hear so you know what to expect if you have to report a spill.**

**I. Introduction**

With Anhydrous Ammonia being a large part of American agricultural, manufacturing, commercial, and transportation industries and incidents occurring in the past across the United States, there is a possibility that at some point a large ammonia incident may occur. TRANSCAER® has created a high-quality training program that will help prevent and or mitigate such an incident for emergency responders in communities where anhydrous ammonia is manufactured, stored, shipped, transported, or used in high volume quantities. All the materials were developed by our team of seasoned experts from across various industries. 6:21

**II. Properties**

This module we will cover the properties of anhydrous ammonia and provide general understanding and guidance to emergency responders in addressing anhydrous ammonia incidents. 57:05
