

Potential Paths to Funding

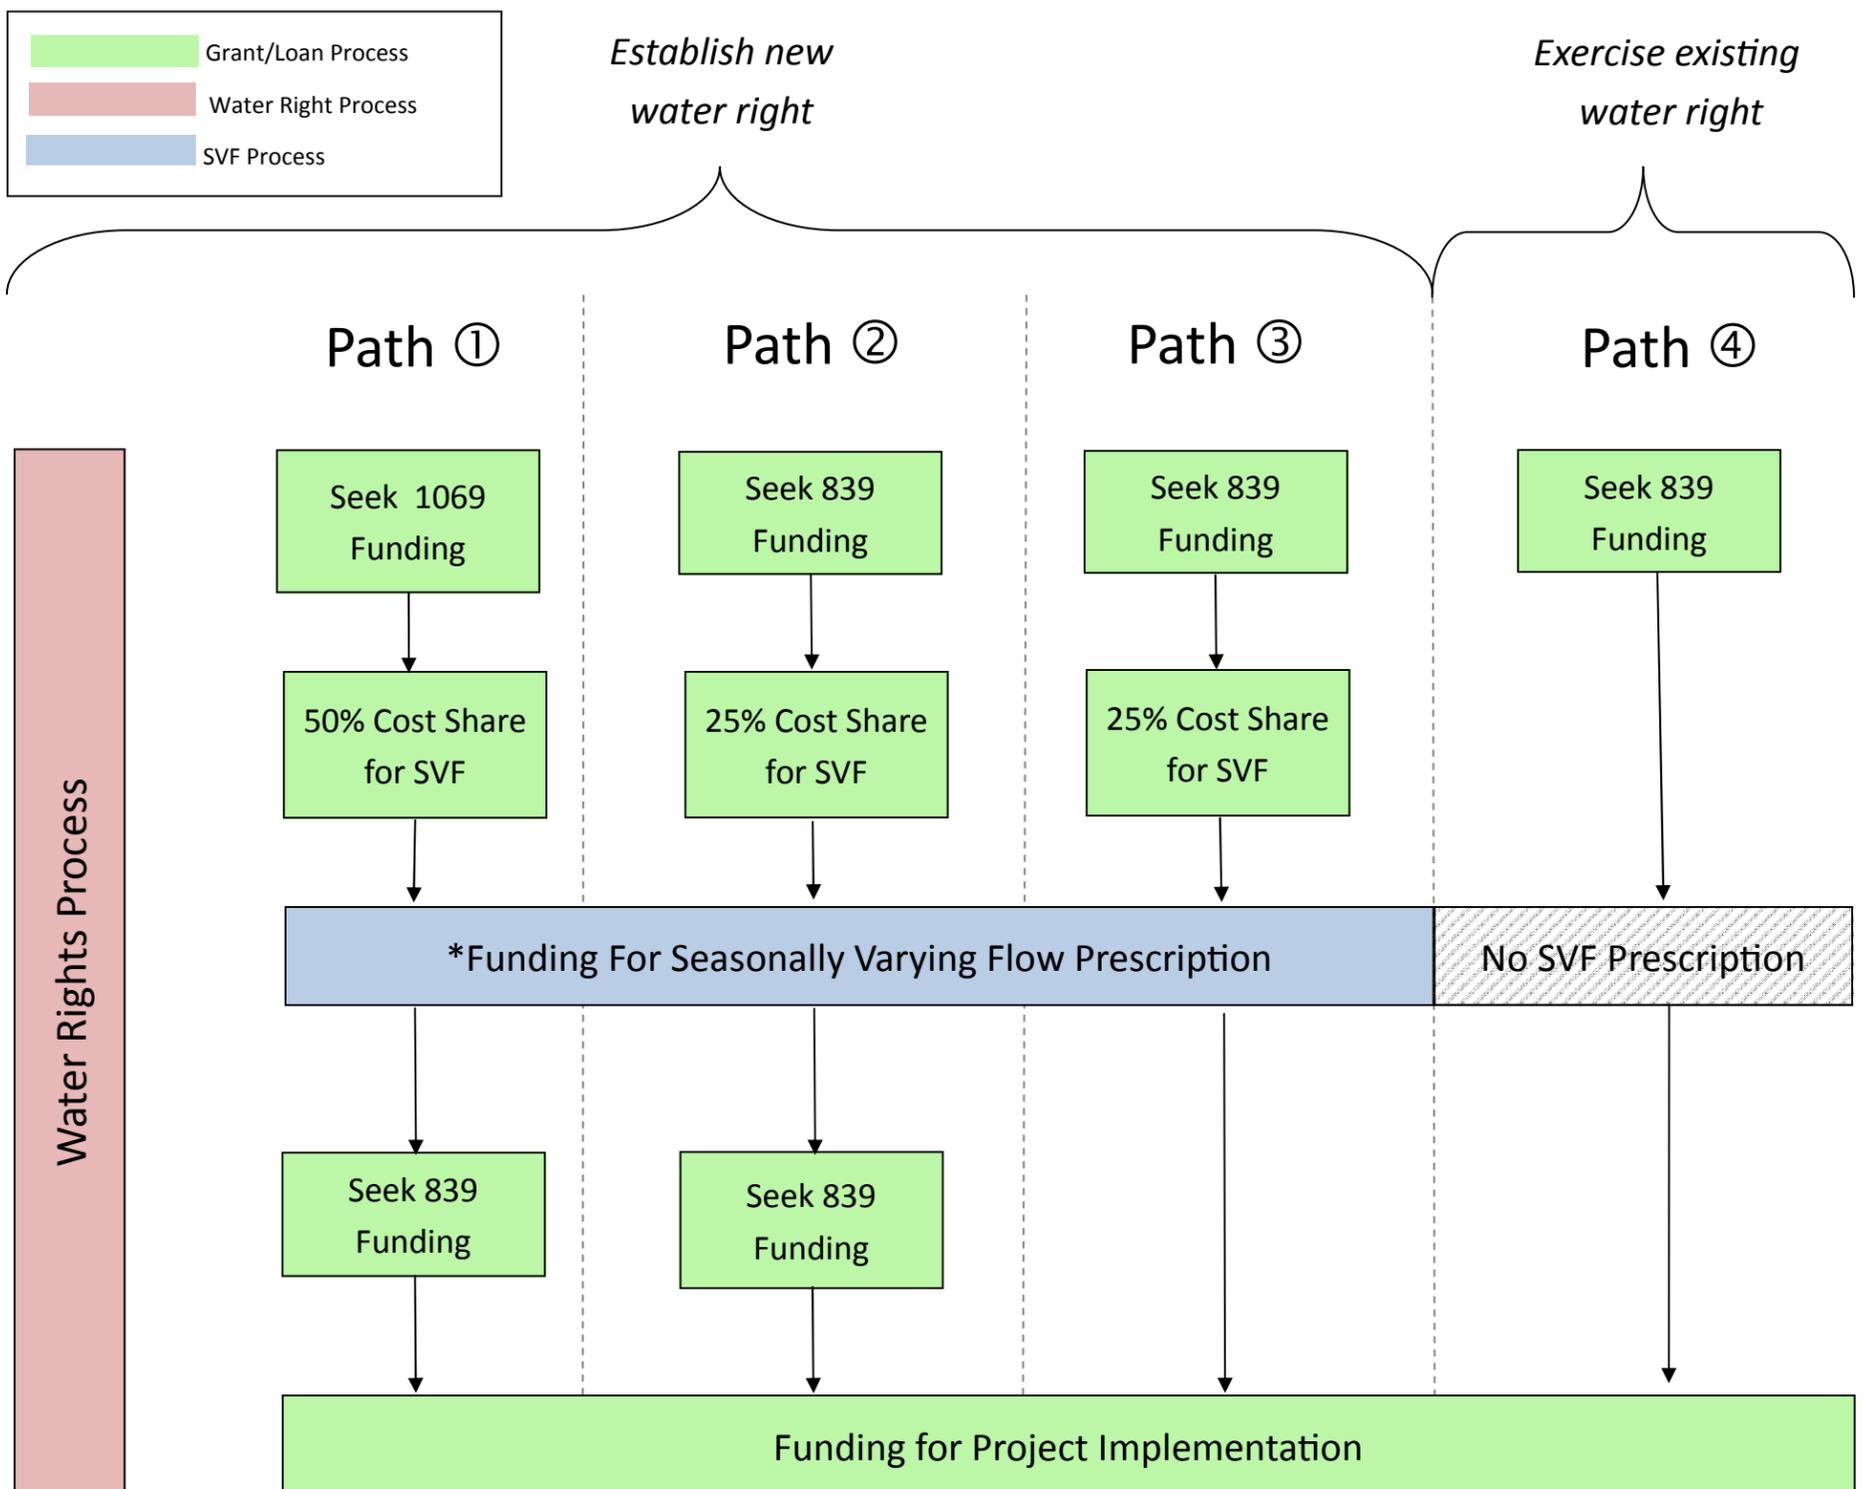

Seasonally Varying Flows and Storage Project Implementation

Path ① Use 1069 funds to perform SVF studies to develop flow prescriptions, then apply for 839 funds for project implementation; seek new water right.

Path ② Use 839 funds to perform SVF studies, then apply for 839 funds again for project implementation; seek new water right.

Path ③ Use 839 funds to perform SVF, and project implementation concurrently; seek new water right.

Path ④ Use SB 839 for project implementation only; exercise existing water right. No SVF required.

*Grant or direct spending by OWRD

Approximate Time Requirements for Implementation Processes

Grant Process: 4 to 5 months after closure of annual grant/loan application deadline

SVF Process: 6 months to 3 years from initial SVF consultation to approved flow prescription

Water Right Process: Generally 1 year or more to obtain water right permit
