Subject: Rescheduling of medical marijuana

Dear Karen S. Maclean and Board of Pharmacy:

I am a nurse and I am very familiar with the scheduling of drugs. Marijuana is now schedule one which means no medical usefulness. We have enough science now to know that marijuana is a safe and effective medicine. Our own federal government grows it for several patients. I've seen too many medical marijuana patients suffering with pain and anxiety caused by this incorrect scheduling.

Now is the time to correct this and reschedule it. Marijuana does not belong in schedule 1. Please do your job to correct this error. Thank you. Sincerely, May Wiley
RN
