**Subject:** A Simple Definition can do Wonders

Hello,

Although our message is designed for the Federal government, it can be adopted at the State level to set an example for the Federal government. Here is a point I hope the Oregon Board of Pharmacy considers.

With a simple definition of marijuana, cannabis can again be a useful legal plant while maintaining the official prohibition of marijuana. A simple definition of marijuana, by itself, can reduce most of the harm that is associated with it. A simple definition of marijuana can produce better social, economic, medical and legal results. A simple definition of marijuana requires much less legislative effort than full-out legalization. A simple definition of marijuana can be plainly stated, easily understood, and reflect the obvious reality of marijuana. Check it out:

"The term 'marijuana' means all parts of the smoke produced by the combustion of the plant Cannabis sativa L."

Join the Peloton, and demand a simple definition of marijuana to evolve the exercise of civics.
